About me

Pursuing a Bachelor's degree in Information Technology, specializing in Information and Network Security, at the University of Makati. Focused on delivering innovative and seamless digital experiences. Proficient in front-end development and web design, with foundational knowledge of HTML, React JS, and Tailwind CSS. Dedicated to creating responsive, user-friendly websites that combine technical precision with creative problem-solving to deliver impactful digital solutions.

Academic Projects

Foodify: Development of Android Application for Food Ordering System Using Java and Android Studio.

- Designed the user interface for the cafeteria food delivery system developed for the University of Makati.
- Developed a prototype to outline user interactions

Development of interactive E-commerce system for ABA Racing: Motorcycle Parts and Repair Shop.

- Designed a user-friendly and engaging interface for the system.
- Collaborated with the backend team to ensure the smooth and effective integration of system features.

ISMS Inventory System (Present)

- Currently working on the frontend of the system using React.js and Tailwind CSS.
- Designing a user-friendly and engaging interface for the system.
